

SAINT®

SAINTstick® Start Guide

Your SAINTstick is a bootable USB drive that contains Ubuntu Linux with SAINT installed on it. Please insert your SAINTstick in a USB port and reboot your PC. The first screen that you see when you boot is the bios screen and should have a command to choose the boot order, usually F2 or F12. It will show you a list of drives to boot from, select the Removable USB Device. You should then see a splash screen with Ubuntu on it while it is booting into the SAINT desktop.

For more information or assistance the SAINT Customer Support Team would be happy to help. You can reach them at:
